

CSPB 3308

Team 8

Milestone 3 - Weekly Status Update

...

Scrum master: Ching-Hsiang (Sean) Lin

Progress Since Last Week & Completed Tasks

- Product scope
 - Clarified the required feature set: login, signup, adding reviews, adding courses
 - Added more wireframe sketches: guest view and admin panel
 - Added flowcharts for home pages and review writing
 - Defined the scope of a minimum viable product
- Repository
 - Created a Flask skeleton
 - Defined a set of routes to be implemented

Current Design - Login & Signup

The image displays two side-by-side browser screenshots of the CSPB Course Reviews website, showing the login and signup pages. Both pages have a dark blue header with the CSPB logo and 'Course Reviews' text. The browser address bar shows the URL 'https://cspb-reviews.com/login' for the left page and 'https://cspb-reviews.com/signup' for the right page.

Left Page (Login):

- Log In** (Section Header)
- Welcome back! Please log in to your account.
- Email** (Label)
-
- Password** (Label)
-
- [Forgot your password?](#)
- Log In** (Blue Button)
- [Don't have an account? Sign up](#)

Right Page (Signup):

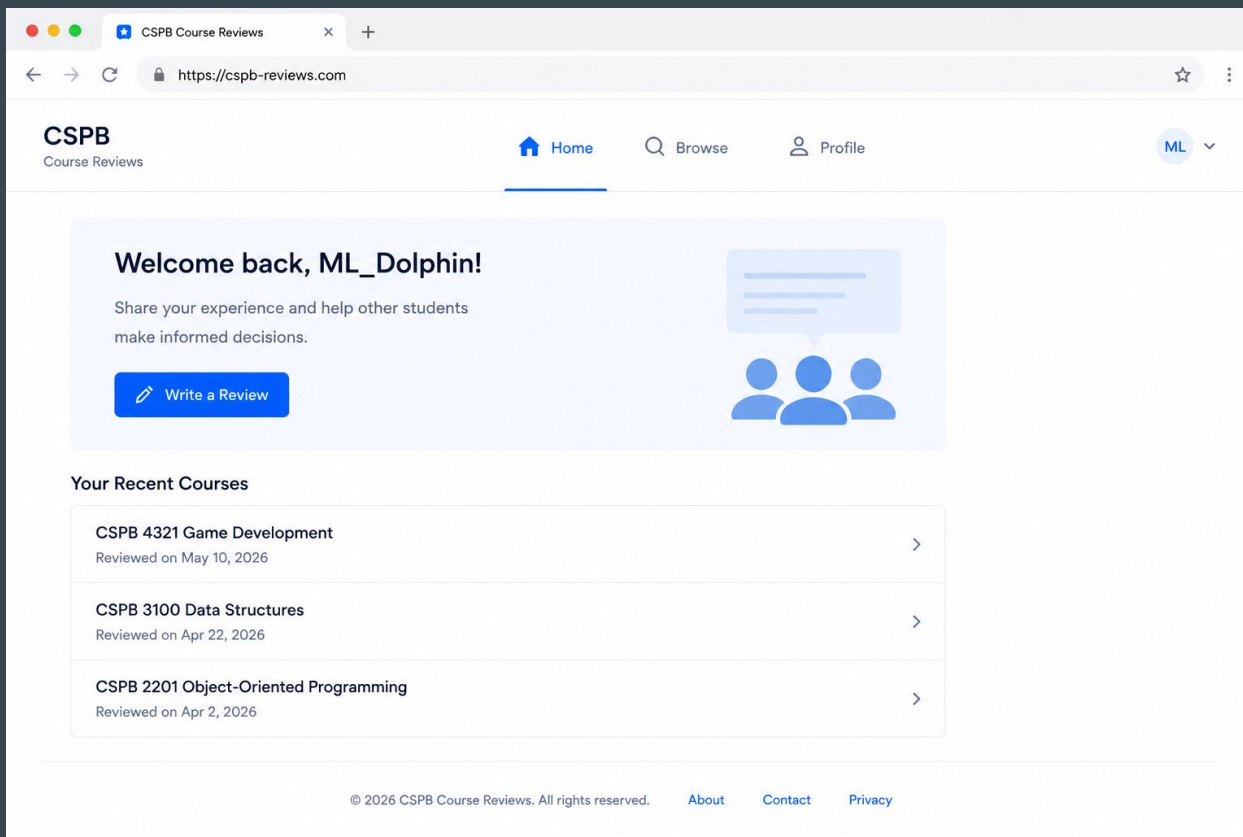

- Create Account** (Section Header)
- Join CSPB Course Reviews to share your experience.
- Full Name** (Label)
-
- Email** (Label)
-
- Password** (Label)
-
- [Forgot your password?](#)
- Sign Up** (Blue Button)
- [Already have an account? Log in](#)

CSPB 4321 Game Development - 4 credits

1

When did you take this course?

Year: ▾

Semester: ▾

2

What is your overall rating for this course?

☐ ☐ ☐ ☐ ☐

3

How difficult was the course? (1 = very easy, 5 = very hard)

4

How many hours per week did you spend on this course?

▾ hours per week

5

Tell us what you think about this course (optional)

Home Page Behavior Based on User Role

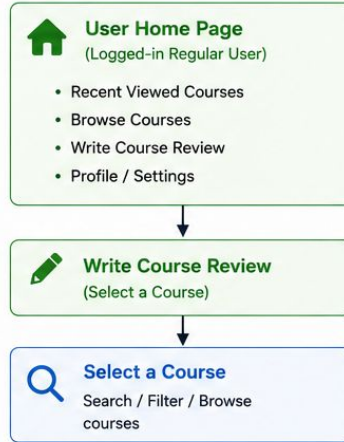

This flow shows what happens when a user opens the site (home page) and how the experience changes based on authentication and role.

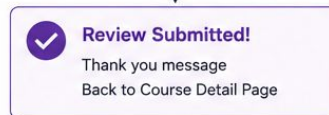

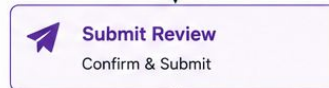

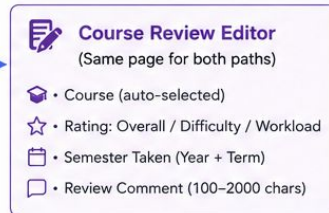

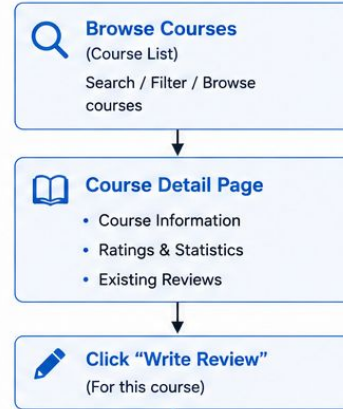

Course Review Writing Flow

Two ways for a logged-in regular user to write a review.
Both paths lead to the same review editor.

WAY 1: Start from User Home

WAY 2: Start from Browse Courses

Notes

- User must be logged in.
- Only regular users can write reviews.
- Admin users follow a different flow (manage courses).

LEGEND

- User Home Flow
- Browse / Course Flow
- Review Writing Flow
- Main Flow
- Alternative Path

Planned Tasks for Next Week - Front-End Design

- Begin frontend page layout design
- Determine user interface elements for each page
- Design the initial database schema corresponding to the frontend design
- Determine how pages link to each other
- Expand on basic backend routes for users

Blockers and Issues

- Resist the temptation to add more features before implement core features
- Defer more advanced features such as admin moderation until time permits

Risks and Mitigation

Identified Risk: Potential feature creep

Mitigation:

- Strict adherence to MVP scope and milestone requirements
 - Focus only on a short list of CSPB courses and the current set of essential features
 - Identify must-have features and nice-to-have features
- Identified Risk: Potentially code conflicts
- Everyone should create a branch for development while working on part of the project. Avoid pushing directly to the main branch without peer review.

Team Reflection

- The brainstorming sessions have been going well.
- Collaboration on the same project repository requires clear workflow and branch management.
- The current repository structure can be further improved for better structure and division of work. The weekly status format was found to be useful for maintaining accountability and focus.

Individual Contributions This Week

- **Hannah Pfeifer:** Set up initial backend app with placeholders using Flask in repo, added .gitignore file to repo, contributed to software specifications and questions to resolve on Google Doc, added tasks to Trello board, set up initial weekly status document
- **Adam Chathankeo:** Contributed to software specifications on Google Doc, added tasks to Trello board
- **Craig Sanders:** Contributed to software specifications on Google Doc
- **Ching-Hsiang (Sean) Lin:** Coordinated meeting agenda, added pages for guest home page and admin panel, and added flowcharts
